CSCI 234 – Software Engineering
Sprint Retrospective Review

Name: Christine Colvin

Team Name: Group 7 Sprint Number: 3

Reflect on the last sprint. In order to improve your team's performance, record your thoughts about what the team should start doing, stop doing, and continue doing. Use back of this sheet and/or other sheets of paper if you need more space for your comments.

START DOING:

Communicating what we expect and want done from one another so we are not waiting for certain things to be implemented when if one person is behind and not able to finish something while another has free time, they can pick up this work so the project is not uncompleted the day before the due date.

STOP DOING:

Leaving others unaware of issues that they are having or issues with the code that may not be compatible with their code.

CONTINUE DOING:

Continue to help each other and work together in order to not allow other teammates to fall behind or work with bad code

ANY OTHER COMMENTS:

I believe we work well as a team and no one falls short of expectations, there is lot of productivity and there have not been collaborative issues or internal conflicts.
